**RE: *Future Relationship of AV Solutions and  
The Glenn Armentor Law Corporation***

Dear Matt and Associates:

Thank you for the knowledge, professionalism, valuable advice, attention to detail and the overall quality of work that you have extended to us over the last two years. The principal and associates of The Glenn Armentor Law Corporation have benefitted greatly from having retained you, worked with you and learned from you over that time. We are extremely grateful for the good things you have brought to our law firm and allowed us to use in more appropriately and effectively representing the injured individuals who make up our client base.

We have come to believe, now that you have provided us with a "smart conference room" with world-class electronics capabilities, that most law firms would benefit tremendously from the same type of knowledge-driven instrumentation and cutting-edge electronic equipment.

For that reason, and because we gave our word a long time ago, we are available to you as a firm, and our conference remains an appropriate marketing tool for you to use, in bringing this type of knowledge-driven electronic environment to others. We stand ready to assist you in spreading the word of your capability, your product, your knowledge and the good things you bring to business environments throughout Louisiana. You have our permission to make use of invitations to our facility for viewing the smart conference rooms you have placed into it for us, and you may rest assured that our management will have glowing testimonials for the work you have done for us these last two years.

Simply stated, whatever we can do to assist you in furthering the production of the smart conference rooms in which you specialize so capably, we are willing to do.
